

# PEDESTAL DRINKING FOUNTAIN

## Ideal for:

- ☐ Schools
- ☐ Parks & Reserves
- ☐ Playground Areas etc

Order/Specify as:

**CCTBPI (Version 1-8)**

- ☐ Manufactured from heavy duty Stainless
- ☐ Built to withstand vandalism in outdoor areas
- ☐ Brackets on either side (square-ended) help to protect plumbing fittings
- ☐ An optional cover plate that fits under each bracket to conceal all fittings is also available
- ☐ Each bracket comes standard with a protective bubbler shroud to help prevent bubbler rotation and removal by vandals.
- ☐ The base of the posts is designed to be concreted into the ground 300-400mm with two cross-bar reinforcing rods (supplied) for additional foundation support.
- ☐ Welded base plate available as an optional extra to mount the fountain on an existing flat concrete surface

Installation of all models needs to be made near a 15mm mains pressure potable water supply (with an in-line pressure limiting valve – 105PSI Max). It also needs a well drained concrete surface area for excess water run-off

## Features & Dimensions:

- ☐ 75mm x 75mm stainless steel steel pedestal post – 1200mm long concrete in ground model
- ☐ Shrouded brackets on each side and either a standard drinking style bubbler or a bottle filler bubbler facing down
- ☐ LK 142 push button bubbler incorporates nylon cased, frost-free internal adjustable water stream height regulator.
- ☐ Quick release push-fit John Guest connectors take 3/4" feed lines down inside post to a common "T" which exits into one 3/4" pipe for the installer to attach fittings to.
- ☐ Heavy duty 12mm bolts attach brackets to main pedestal.
- ☐ Top of pedestal post capped.
- ☐ Construction is of the best quality. Shot Bead Blasted Finish Long life expectancy. All hole/brackets drilled prior.
